

## ENDS AND TRENDS WITH KIM AND KAREN

**Karen's Trend Alert:** I know the weather is starting to get warm but I like to plan ahead for those cooler days and nights of fall and winter. So, even though we're far from those really brisk temperatures, I want to make sure I keep you up-to-date on one of my favorite accessories: touch-sensitive gloves.

When it's really chilly and you're trying to pass the time away or do some quick cell-phone related tasks, you're faced with two choices: taking off your gloves and braving the temperatures to search the internet or make a call – or keeping your gloves on and waiting until later! Or, if you're super lucky, you might use your fingerless gloves that minimize the exposure to cold.

Now, thanks to touch-sensitive gloves, you can pretty much keep your fingers nice and warmly covered while checking your e-mails or your Facebook! That's genius, I say!

Touch-sensitive gloves can be found just about everywhere and in a variety of colors, styles, fabrics and prices. So, you can be stylish and warm while Tweeting away!

And you are welcome... because I know you'll be thanking me later!
